

# TAKE ACTION

in Your School or Child Care Center

## 1 Start a conversation

Talk with your school principal, administrator or center director about your facility's environmental health, including lead and radon.

## 2 Check status

Find out if any testing or mitigation has already been completed.

## 3 Get involved

Get your school/child care center set up to do it.

## 4 Seek help

Contact Healthy Schools PA for technical assistance.

## 5 Learn more

Though the project has ended, visit [1000hoursyear.org](http://1000hoursyear.org) and download info about effects of lead and radon. Learn more at [info@healthyschoolspa.org](mailto:info@healthyschoolspa.org)

## 6 Spread the word

Connect with Healthy Schools PA on social media and be a champion for your school or child care center.
